two types of indicators let you know if a package has been damaged in transit or handling.

each indicator comes with two warning labels; one to attach to the top or side of the shipping container, and one affixed to the bill of lading to alert the carrier and consignee that the shipment has been monitored.

damage/impact indicators

TIP (N) TELL™

indicates if a package has been tipped over in handling.

the TIP (N) TELL is a low cost system to warn of possible damage to a container that has been tipped in transit. It is so sensitive that it will indicate if a container has been gently tipped on either side or completely upended.

standard package contains 100 plastic indicators, 100 labels, and an instruction sheet.

DROP (N) TELLS are sold individually/TIP (N) TELLS are sold in packages of 100.

DROP (N) TELL™

a blue arrow indicates impact has exceeded G level shown in center of indicator.

the DROP (N) TELL is a low cost plastic impact indicator, that indicates when a G range has been exceeded. after the unit has activated, it cannot be mistakenly reset or easily tampered with. non-re-settable. G ranges available: 5, 10, 15, 25, 50, and 100.

standard package includes: one plastic indicator, bill of lading label, container warning label, and an instruction sheet.

automatic/electric label dispensers

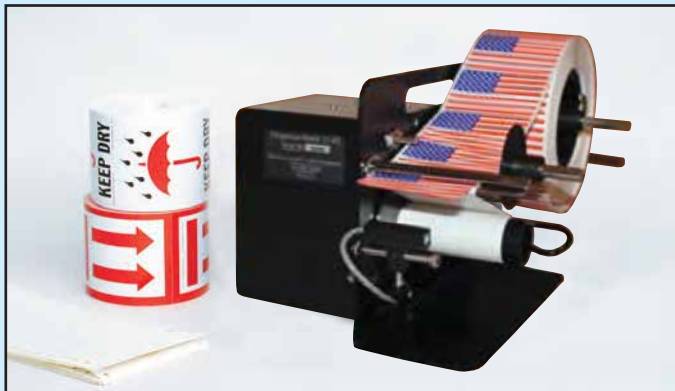

now available with photo-eye technology!

If it can be peeled, the photo-eye photoelectric sensor can detect it! With patented IR pulsing technology, this system improves label application. Available on models: SLE-U25, SLE-U45 & SLE-U60. Call for details.

SLE-U25-PE

New, low cost label dispenser. Power advance for roll labels to 2.5" width. Tension guide is standard for thin labels. Optional reverse switch available for labels under .5" length/width.

SLE-U45-PE

A simple heavy-duty semi-automatic electric label dispenser that is designed for roll labels and will accept one-up computer forms from 3/8" to 4-1/2" widths, rolls up to 9" in diameter. This label dispenser advances at over 5" per second Standard Speed.

SLE-U45-HS

High Speed Version advances at 11" per second.

SLE-U60-PE

A simple heavy-duty semi-automatic electric label dispenser that is designed for oversized labels, will accept rolls or one-up computer forms from 3/8" to 6" widths, rolls up to 9" in diameter. Recommended for large labels and particularly those exceeding 3" to 4" depth where the faster label delivery may be beneficial. The SLE-U60-PE label dispenser advances at over 7" per second Standard Speed.

NOTE: Micro Switch version also available

placard numbers and placard number kits

pressure sensitive numbers can be used on tagboard or vinyl placards. The 3 1/2" high, self-spacing numbers are printed in black on white vinyl or clear film panels, 2 1/8" X 4". Panels are recommended for use on reflective placards.

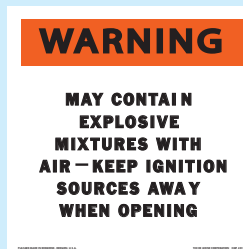

individual numbers are in packages of 50. numbers are available in kits of 600 or 1200, extra zeros and ones are included in each kit.

right to know labels

all labels shown are available for immediate shipment.

custom printed available

RTK 100, 200, 300, 400 and 500 series are packaged 500 labels per roll.
RTK 600, 700, 900, and 1100 series are sheeted and packed in 100 sheet packages.

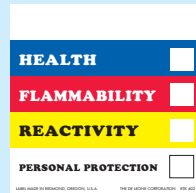

the Hazard Communication Standard specifically mandates that all containers of hazardous material be labeled with an appropriate warning. while this warning does not have to include all of the information contained on the MSDS, it does have to convey enough information to tell the user the name of the chemical, the name and address of the manufacturer, the type of hazard that exists, how to properly handle the chemical or type of protective equipment necessary, and possible specific damage (i.e. lung damage).

the most popular label systems use a number rating and color coding for the three areas of HEALTH (blue), FLAMMABILITY (red), and REACTIVITY (yellow), and an ALPHABETICAL rating for the type of personal protective equipment to use.

nflpa

the National Fire Protection Association (NFPA) has developed a coding system that is useful in safeguarding those involved in fire prevention and control. the NFPA uses color coded hazard areas: FIRE (red), INSTABILITY (yellow), SPECIFIC (white), and HEALTH (blue). these labels are useful in identifying materials whose fire hazard is not readily apparent.

LDM series manual label dispensers

**new line of manual label dispensers - cost effective
productive • versatile**

LDM 300

- 3" wide
- 1 set of adapters

LDM 450

- 4-1/2" wide
- 1 set of adapters

wall mount

- all models easily wall mount
- saves table work space

LDM 850

- 8-1/2" wide
- 2 sets of adapters

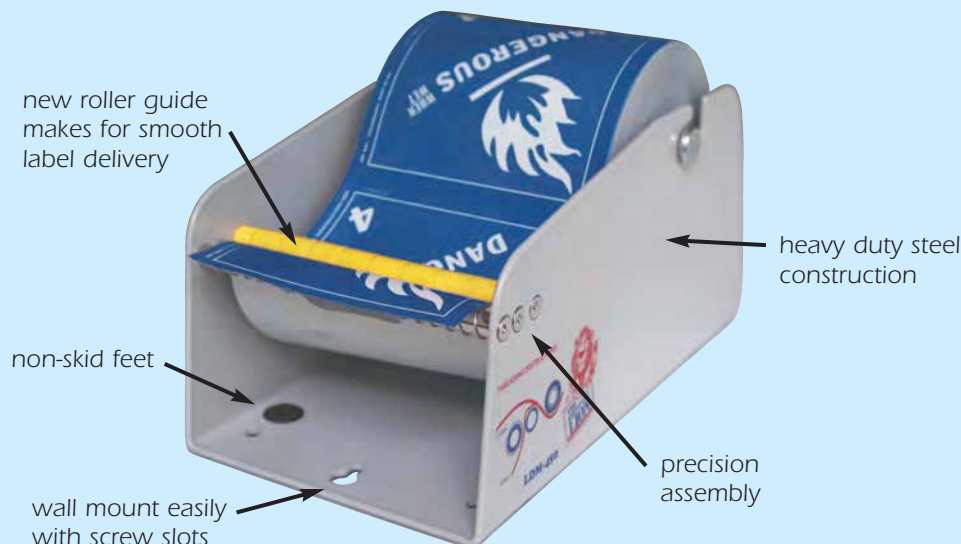

Extra 3" core adapters are available.

LDM 1250

- 12-1/2" wide
- 3 sets of adapters

new LDM features

- **convenient** - ready for wall-mount or use on counter.
- **easy to use** - quick to load and thread, just pull on liner & label is ready to apply.
- **versatile** - use any size or shape label - square corner or diecut - up to 12 1/2" wide, roll diameter up to 7".
- **flexible** - 3" core adapters are available.
- **durable** - heavy duty - all metal construction.
- **economical** - all these features at a price you can't afford to pass up!
